## Building Services: Water Supply

### Pressure Booster Systems

## DeltaSolo/Basic Compact

DeltaSolo Compact MVP

DeltaBasic Compact MVP

#### Main applications

- Spray irrigation systems
- General irrigation systems
- Service water supply systems
- Domestic water supply
- Rainwater harvesting
- Water supply systems

#### Fluids handled

- Drinking water
- Service water
- Cooling water
- Fluids not chemically or mechanically aggressive to the materials

#### Operating data

**Table 1: Operating properties**

Characteristic	Value	
Flow rate	$Q \text{ [m}^3/\text{h}]$	$\leq 18^{1)}$
	$Q \text{ [l/s]}$	$\leq 5$
Head	$H \text{ [m]}$	$\leq 55$
Fluid temperature	$T_{\min.} \text{ [}^{\circ}\text{C]}$	$\geq 0$
	$T_{\max.} \text{ [}^{\circ}\text{C]}$	$\leq +40$
Operating pressure	$p \text{ [bar]}$	$\leq 10$
Inlet pressure	$p_{\text{inl}} \text{ [bar]}$	$4 - 5,5^{2)}$
Motor rating	$P \text{ [kW]}$	1,50

#### Design details

#### Design

- Fully automatic pressure booster system
- Variable speed operation
- Baseplate-mounted
- Membrane-type accumulator (direct-flow) to DIN 4807-5 on the discharge side, approved for drinking water, with shut-off element and drain valve.
- One or two horizontal high-pressure pumps with variable speed system
- Hydraulic components made of stainless steel / brass
- Lift check valve for each pump
- Pressure gauge
- Integrated dry running protection
- Pressure transmitter on the discharge side
- Anti-vibration pads per system

#### DeltaBasic Compact:

- Discharge-side gate valve per pump
- Suction side ball valve or shut-off butterfly valve per pump
- Suction-side manifold and discharge-side manifold made of stainless steel

#### Installation

- Stationary dry installation

#### Drive

- Electric motor
- Enclosure IP55
- Efficiency class IE3 to IEC 60034-30 ( $\geq 0.75 \text{ kW}$ )

#### Automation

- One frequency inverter per pump
- Motor protection switch per pump
- Fuse box

<sup>1</sup> Without stand-by pump

<sup>2</sup> The inlet pressure depends on the pump size.

**Designation**

## Configuration and function

**Fig. 1:** Design DeltaSolo Compact MVP, DeltaBasic Compact MVP

1	Fuse box	4	Membrane-type accumulator
2	Frequency inverter	5	Connections
3	Baseplate	6	Pump

### Design

The fully automatic pressure booster system pumps the fluid to the consumer installations in the set pressure range using one or two non-self-priming horizontal high-pressure pumps (6).

### Function

#### Automatic mode

The pump is controlled and monitored by a motor-mounted frequency inverter.

The standard setting is for the pressure booster system to start automatically as a function of pressure; the actual pressure is measured by an analog pressure transmitter.

The use of this variable speed pump significantly reduces wear as well as the frequency of pump starts in parallel operation.

If the demand drops towards 0, the pressure booster system slowly runs down to the stop point and stops.

The pressure booster system is designed with dry running protection.

If the pump has not been in operation for 24 hours, a test run is initiated.

### Function

#### Manual mode

In manual mode, a minimum flow is required to protect the pump against overheating.

## Materials

**Table 4:** Overview of available materials

Part No. (⇒ Page 15)	Description	Material
101	Pump casing	1.4308
10-6	Pump shroud	1.4301
200	Hydraulic system	1.4301
412	Elastomer	EPDM
433	Mechanical seal	To EN 12756
591	Membrane-type accumulator, connection	1.4401
742	Swing check valve	POM (polyoxymethylene)
743	Ball valve	Brass, nickel-coated
890	Baseplate	Steel, powder-coated
-	Membrane	Approved for drinking water

## Product benefits

- Plug-and-play design for straightforward commissioning
- Very compact, space-saving design
- Energy-efficient operation and constant pressure ensured by speed control of all pumps.
- Corrosion resistance provided by powder-coated materials and stainless steel
- Integral dry running protection for reliable operation

## Solution:

1. Subtract the inlet pressure of 1 bar (approx. 10 m) from the head.  
⇒ This results in a required head of 40 m.
2. Transfer the values to the characteristic curves diagram to select the corresponding pump.  
⇒ This results in the selection of a DeltaSolo Compact MVP 1/0406.

## Product information

### Product information as per Regulation No. 1907/2006 (REACH)

For information as per European chemicals regulation (EC) No. 1907/2006 (REACH) see <https://www.ksb.com/en-global/company/corporate-responsibility/reach>.

## Certifications

**Table 5:** Overview

Label	Effective in:	Comment
	France	Approved in accordance with the French drinking water regulation
	United Kingdom	Approved in accordance with the UK drinking water regulation

### Globe valves and swing check valve:

	Germany	Approved in accordance with the German drinking water regulation
--	---------	--

## Selection information

### Selection example

#### Requirements:

Required duty point:

- Flow rate: 4 m<sup>3</sup>/h
- Head: 50 m
- Inlet pressure: 1 bar

## Technical data

### DeltaSolo Compact MVP

MVP = variable speed pressure booster system

1 × 230 V ± 10 %

Dry running protection = via power factor, external contact (standard) and pressure switch (optional)
